Projects

CRAVY - A FOOD ORDERING APP | https://github.com/anand-2/cravy

A food ordering web app that allows restaurants to register themselves, upload their menu and dishes.
Users can add dishes to their cart and place an order with the restaurant. The app is built using React, Express NodeJS and PostgreSQL

MYMEDS - A MEDICINE REMINDER APP | https://github.com/anand-2/mymeds

A medicine reminder Android application that allows a user to add reminders by providing medicine name and time of day. On the specified time, a notification is shown on the user's tray, with a sound.
